

The Ecology and Conservation of California's Maritime Chaparral

Coastal Training Program
Elkhorn Slough National Estuarine Research Reserve

- ### Why Maritime Chaparral?
- Highest number of the Monterey Bay's most imperiled species
 - Key to protecting Elkhorn Slough's watershed
 - New ecological information
 - Interesting challenge to human/wild interface

- ### Overview of Workshop
- Endangered species
 - Diverse, beautiful, and interesting (fungi, flowers, critters)
 - Human development and altered disturbance regimes
 - Changes in human perception and action for conservation

- ### Not Yet, But... (the little things that matter)
- Ants invading 20'/year
 - Exotic fungi
 - Genetic mischief
 - ??? next ???

Agenda

- 9:15 – 10 Eric Van Dyke & Karen Holl
- 10 – 10:45 Tom Parker
- 10:15 – 11 Break
- 11 – 11:45 Dennis Odion & Claudia Tyler
- 11:45 – 12:30 Panel Q & A
- 12:30 – 1:30 Lunch
- 1:30 – 5 Field Trip
